

Sonia Airaldi was born on March 21, 1986 in Mondovì, Italy and received Medical Degree with full mark "cum laude" and without delays from the University of Genoa, Italy on 2011. During undergraduate training, she had internship at the Department of Radiology (DISSAL) of the University of Genoa, Italy. Since 2012, her practice involved breast imaging and musculoskeletal radiology with special reference to ultrasound and magnetic resonance. Currently, she is resident in Diagnostic Radiology (V year of training) at the University of Genoa, Italy following a selective high-level educational path and performs clinical and research activity in the field of musculoskeletal and peripheral nerve imaging. She has proven academic success with publications on international medical journals (English literature) in which manuscript decisions are based on peer review. She has held n=12 lectures as invited speaker at international Courses or Congresses. She was also awarded by the Italian Society of Medical Radiology for her research on breast density using digital mammography and tomosynthesis.
